

AI Empowerment Pulse

CURRENT-WINDOW BRIEF | 17 Aug 2026 - 23 Aug 2026

A concise public brief on what current AI developments indicate for human empowerment - and how the picture changes when article volume is separated from unique real-world events.

COVERAGE INDEX

+0.84

131 AI-relevant articles

EVENT INDEX

+1.75

123 unique AI events

AMPLIFICATION GAP

-0.91

Coverage minus Event

Four takeaways

OVERALL DIRECTION

The unique-event signal is close to neutral (+1.75).

AMPLIFICATION

Article repetition barely changes the direction of the signal.
Gap: -0.91 points.

COVERAGE VOLUME

Most coverage units represent distinct developments in this release. Coverage/Event ratio: 1.06.

NARRATIVE CLIMATE

Descriptive Neutral is the largest article-weighted frame (76.3%).

Attention versus unique developments

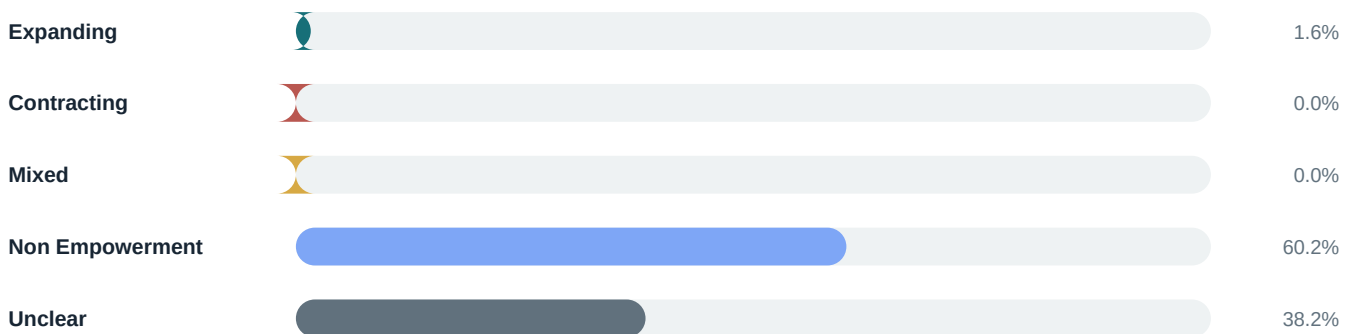

Coverage Lens retains article repetition. Event Lens gives each resolved development one weight. Their difference reveals whether media volume shifts the aggregate direction.

Narrative climate

Event Lens empowerment mix

How to read the signal

COVERAGE LENS	Each observed article receives one weight. Repetition measures attention and framing.
EVENT LENS	Each resolved real-world development receives one weight.
UNIT SCORE	Expanding = +degree/3; contracting = -degree/3; mixed and non-empowerment = 0; unclear is excluded.
AMPLIFICATION GAP	Coverage Empowerment Index minus Event Empowerment Index.
COUNTRY RULE	Search market is not event country. Country signals are released only when evidence thresholds are met.
HUMAN GOVERNANCE	Automated coding is versioned and audited. Human review corrects high-risk cases and periodic stratified samples.

Evidence examples

EVENT 1 | 4 SOURCE ARTICLE(S)

FDA wants feedback on how to regulate generative AI in medicine

EVENT 2 | 3 SOURCE ARTICLE(S)

Alibaba plans a \$10 billion share offering in Hong Kong to finance its expenses.

EVENT 3 | 2 SOURCE ARTICLE(S)

Artificial intelligence could push up inflation - SNB's Tschudin says
